NanoSurfaces R&D office in Milano is located in the north of the town, inside Politecnico di Milano Bovisa-Durando campus.

You can get to NanoSurfaces office from the external ring road (circonvallazione esterna), in a clockwise direction; once you get to piazza Lugano, turn left to via Scalvini; at the first traffic-lights turn left to via Degli Imbriani; pass through piazzale Bausan, then take via Durando, second exit.

If you drive along the circonvallazione esterna in a counterclockwise direction, from piazzale Nigra turn right to via Degli Imbriani and, past piazzale Bausan, continue on via Durando.

If you use public transport, Bovisa-Politecnico stop of Passante Ferroviario (Blue underground line) is recommended; take the left exit, through via Candiani up to via Durando. Or else you can take the Tram nr.3, whose terminus is at piazzale Bausan.
